MEETCHINA365

FROM MARKETS METS TO **BETTER PET PRODUCTS**

Global Manufacturing Power for Healthier Pets and Happier Families

CHINA'S TOP FREEZE-DRIED PET FOOD MANUFACTURER

ONE-STOP OEM & ODM SOLUTIONS FOR GLOBAL PET FOOD BRANDS

Premium Natural Ingredients
Safe, Traceable, High Quality

Functional Nutrition Formulas
Support Immunity, Digestion, Joint, Skin & Coat

Advanced Freeze-Drying Technology
Locks in Nutrition and Freshness

OEM & ODM Customization
Formulas, Shapes, Recipes, Packaging

Global B2B Supply
For Pet Food Brands, Distributors, Retailers and E-commerce

14
Freeze-Drying Chambers
Stable Production Capacity

1,200+
Proven Formulations
Meet Different Pets' Nutritional Needs

500+
Brands Worldwide
Trusted by Global Pet Food Companies

40,000 m²
Modern Manufacturing Facility
Hygienic, Standardized, Scalable Production

4,000 Tons
Annual Productiong Capacity
Stable Supply for the Global Market

OUR BUSINESS MODELS

OEM

- ✓ Your Brand
- ✓ Your Formula (or Our Formula)
- ✓ Custom Shapes & Recipes
- ✓ Flexible Packaging Solutions

ODM

- ✓ R&D and Formula Development
- ✓ Functional Nutrition Solutions
- ✓ Unique Product Design
- ✓ Complete Private Label Service

MEETCHINA365 – YOUR US BASE

Business Consultation | Product Development | Factory Coordination | Logistics & Delivery | Ongoing Support

MEETCHINA365 connects you with China's top freeze-dried pet food manufacturer and provides local support in the US.

N&D Immune Support Microsphere Overview & Experimental Data

Create Value | Share the Future

【Main Ingredients】Lactoferrin, Astragalus, L-Lysine, Taurine
【Product Component Analysis Guarantee Value】Lysine ≥0.25%, Taurine ≥0.25%, Moisture ≤10%

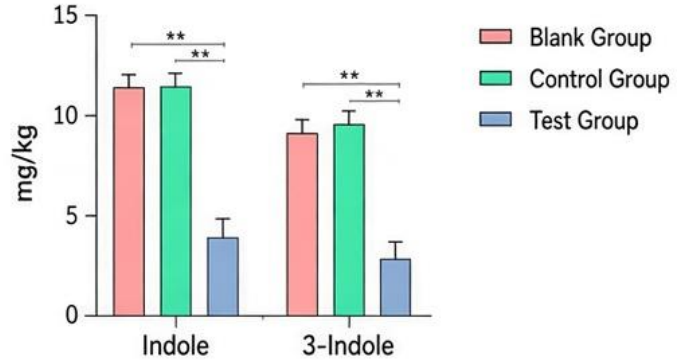

Scan QR code to view full report

The experimental group of dogs and cats showed significantly increased immunoglobulin levels, significantly improved mental state, and increased exercise after continuous use of N&D Immune Support Microspheres for 30 days. Among them, the IgG level in cat blood increased by 51%, the IgA level increased by 21%, and the IgM level increased by 34%. N&D Immune Support Microspheres have a significant improvement effect on pet cat and dog immune problems, and can significantly improve problems such as low immunity in young pets.

N&D Probiotic Microsphere Overview & Experimental Data

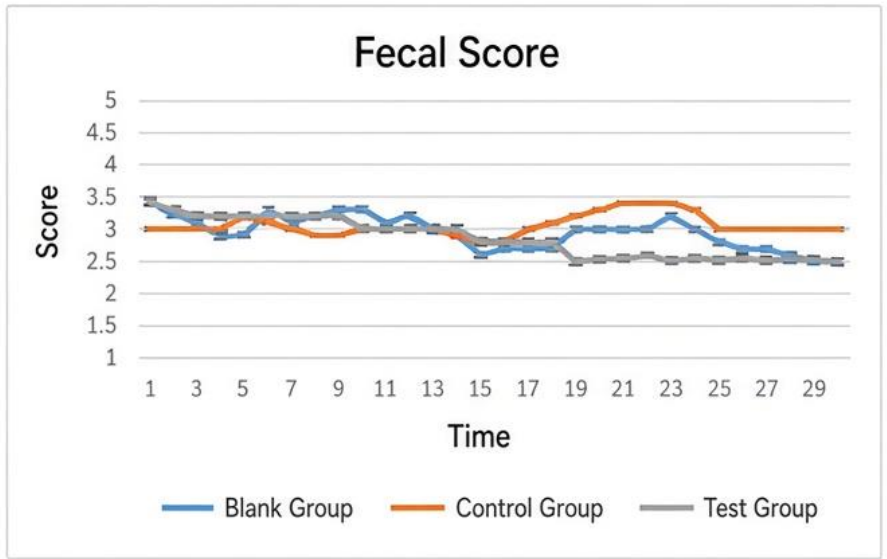

【Main Ingredients】Geobacillus, Hay Bacilli, Coagulated Bacilli, Yeast Powder

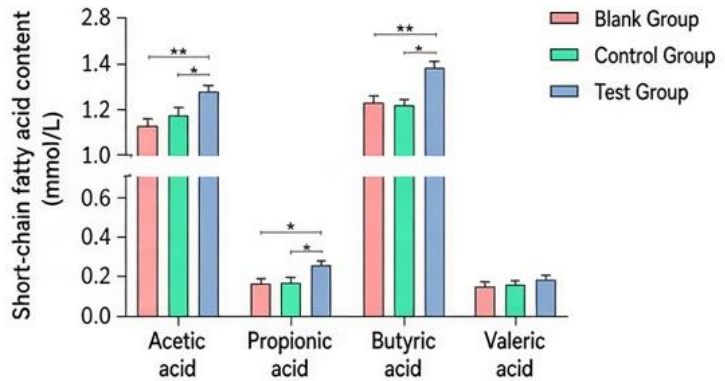

【Product Composition Analysis Guarantee Value】Total viable count ≥ $2.0x10^{10}$ cfu/g, Glutamine 3000-6000mg/kg, Moisture ≤10%

Indole and 3-Indole levels in test group canine and feline feces decreased significantly

Test group canine and feline fecal scores stably remain in the optimal scoring range

Acetic acid and Butyric acid levels in test group canine and feline intestines increased significantly, Propionic acid levels increased significantly

N&D Probiotic Microspheres have significant effects in improving canine and feline digestive performance, enhancing immunity, and maintaining intestinal health, providing strong support for the healthy feeding and nutritional management of pet dogs and cats.

N&D Soothing Microsphere Overview & Experimental Data

Create Value | Share the Future

【Main Ingredients】 Ginseng, Astragalus, γ-Aminolevulinic acid, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, D-Biotin, DL-Methionine, Niacin, Lipase (from A. tubingensis), Dimethyl sulfoxide (MSM)

【Product Component Analysis Guarantee Value】 Methionine ≥1.0%; Total Polysaccharides ≥50000mg/kg; Moisture ≤10%

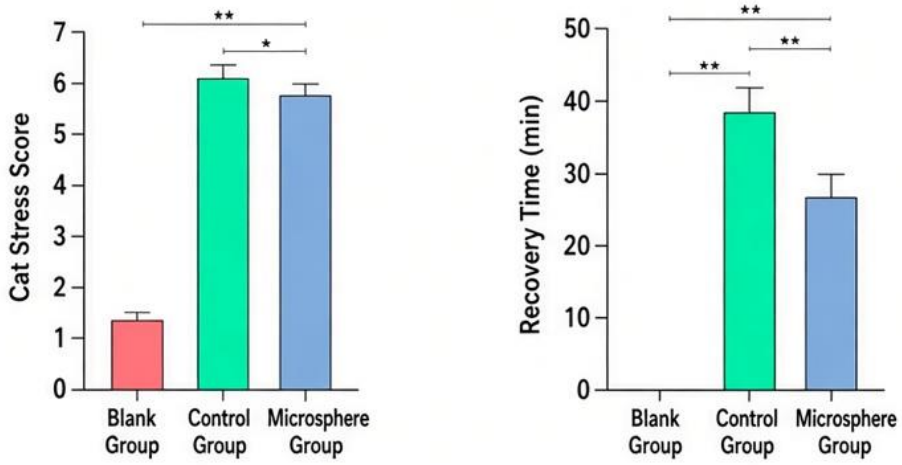

Figure 1: Stress Score and Recovery Time

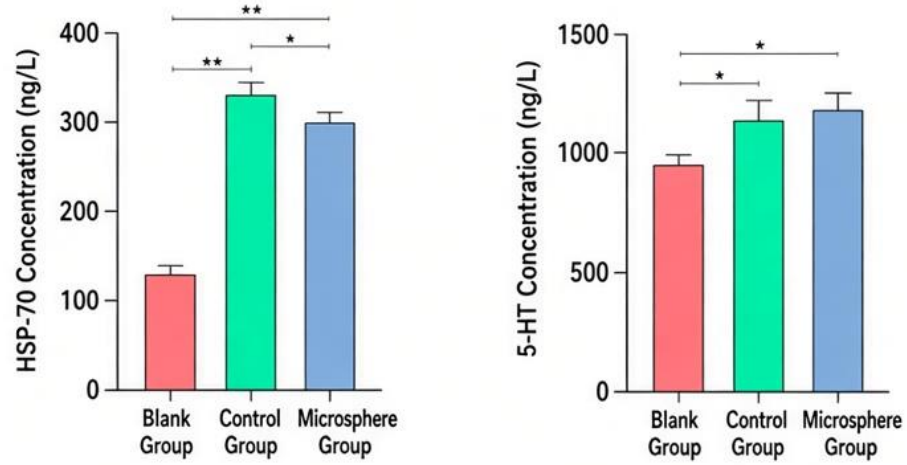

Figure 2: Changes in Serum HSP-70 and 5-HT

Compared with the control group, the ND Soothing Microsphere group showed a significant decrease in CSS score, a highly significant decrease in recovery time, and a significant decrease in serum HSP-70 concentration. This indicates that under the same stimulation conditions, cats in the *Microsphere group can calm down faster, demonstrating* that the microspheres have a certain effect on alleviating stress and excitement in cats.

N&D Tear Stain Control Microsphere Overview & Experimental Data

Create Value | Share the Future

【Main Ingredients】 Astragalus, Ginseng, Grape Seed Extract, Glucosamine Hydrochloride, Cranberry Powder, Blueberry Powder, Taurine, Vitamin A Palmitate, Vitamin D3, Vitamin E, B Vitamins, Folic Acid, L-Lysine Hydrochloride, DL-Methionine

【Product Component Analysis Guarantee Value】

Total Polysaccharides ≥ 15000mg/kg, Taurine ≥ 0.5%, Vitamin A ≥ 45000IU/kg, Vitamin E ≥ 1001U/kg, Moisture ≤ 10%

Table 1: Effect of Tear Stain Control Microspheres on Tear Stain Relief

Sampling Time (Week)	Control Group	Test Group
Week 0 of Trial	3.1±0.7	3.2±0.6
Week 1 of Trial	3.2±0.5	2.7±0.8
Week 2 of Trial	3.2±0.8	2.0±0.4
Week 3 of Trial	3.4±1.0	1.7±0.6
Week 4 of Trial	3.3±0.7	1.5±0.4

Table 3: Effect of Tear Stain Control Microspheres on Serum GSH-Px Activity in Dogs

Sampling Time (Week)	Control Group	Test Group
Week 0 of Trial	94.64±40.31	100.14±44.97
Week 2 of Trial	101.26±29.06	104.50±46.67
Week 2 of Trial	101.50±35.32	106.78±27.93
Week 3 of Trial	101.13±30.65	108.25±43.68
Week 4 of Trial	102.63±36.08	110.58±48.67

The test group supplemented with N&D Tear Stain Control Microspheres ares showed relief after the 2nd week, with a significant decrease in tear stain scores by the 4th week.

The activities of serum SOD and GSH-Px were significantly higher than those in the control group, indicating that the Tear Stain Control Microspheres have an antioxidant effect.

N&D Weight Management Microsphere Overview & Experimental Data

【Main Ingredients】 Turmeric, bacillus cereus, bacillus licheniformis, L-carnitine, proteinase (from bacillus cereus), fat enzyme (produced by aspergillius Niger), amylum enzyme (produced by aspergillius Niger), and glutamamide.

【Product Component Analysis Guarantee Value】 2.0x10^10 cfu/g, Carnitine ≥ 200000 mg/kg; Glutamamide 3000-6000 mg/kg, Moisture ≤ 10%.

Table 3: Effect of N&D Weight Management Microspheres on BCS Scores of Dogs and Cats

a	Dog BCS Score				Cat BCS Score			
	Blank Group	Control Group	Test Group	P Value	Blank Group	Control Group	Test Group	P Value
Week 0	8.35±0.41	8.50±0.62	8.48±0.66	0.36	7.52±0.30	7.65±0.44	7.55±0.25	0.25
Week 2	8.05±0.34	8.21±0.28	7.80±0.15	0.44	7.35±0.11[a]	7.44±0.23[a]	7.10±0.20[a]	0.03
Week 4	7.56±0.36[a]	7.73±0.43[a]	6.22±0.33[a]	0.01	7.10±0.19[a]	7.12±0.45[a]	6.35±0.32[a]	0.03
Week 6	7.02±0.15[a]	7.10±0.08[a]	5.88±0.24[a]	0.01	6.88±0.26[a]	6.94±0.38[a]	5.82±0.34[a]	0.02
Week 8	6.72±0.50[a]	6.55±0.83[a]	5.00±0.00[a]	0.02	6.75±0.45[a]	6.82±0.30[a]	5.50±0.25[a]	0.01

Table 3: Effect of N&D Weight Management Microspheres on BCS Scores of Dogs and Cats

a	Dog Weight Change				Cat Weight Change			
	Blank Group	Control Group	Test Group	P Value	Blank Group	Control Group	Test Group	P Value
Week 0	13.12±1.15	13.25±0.92	13.18±1.26	0.72	5.92±0.31	5.88±0.62	6.02±0.45	0.80
Week 2	12.94±1.04	13.03±0.88	12.88±1.21	1.37	5.72±0.22	5.70±0.42	5.81±0.19	0.30
Week 3	12.77±0.83	12.82±0.79	12.54±0.86	0.22	5.50±0.15	5.58±0.25	5.55±0.40	0.14
Week 4	12.53±0.75[a]	12.55±0.65[a]	11.85±0.69[a]	0.01	5.33±0.30[a]	5.28±0.36[a]	5.06±0.22[a]	0.02
Week 8	12.38±0.05[a]	12.27±0.42[a]	11.24±0.77[a]	0.03	5.13±0.15[a]	5.11±0.30[a]	4,84±0.23[a]	0.01

Compared with the blank group and the control group, the dog BCS scores in the experimental group fed N&D microspheres decreased significantly in the 4th, 6th, and 8th weeks, and the cat BCS scores decreased significantly in the 2nd, 4th, 6th, and 8th weeks.

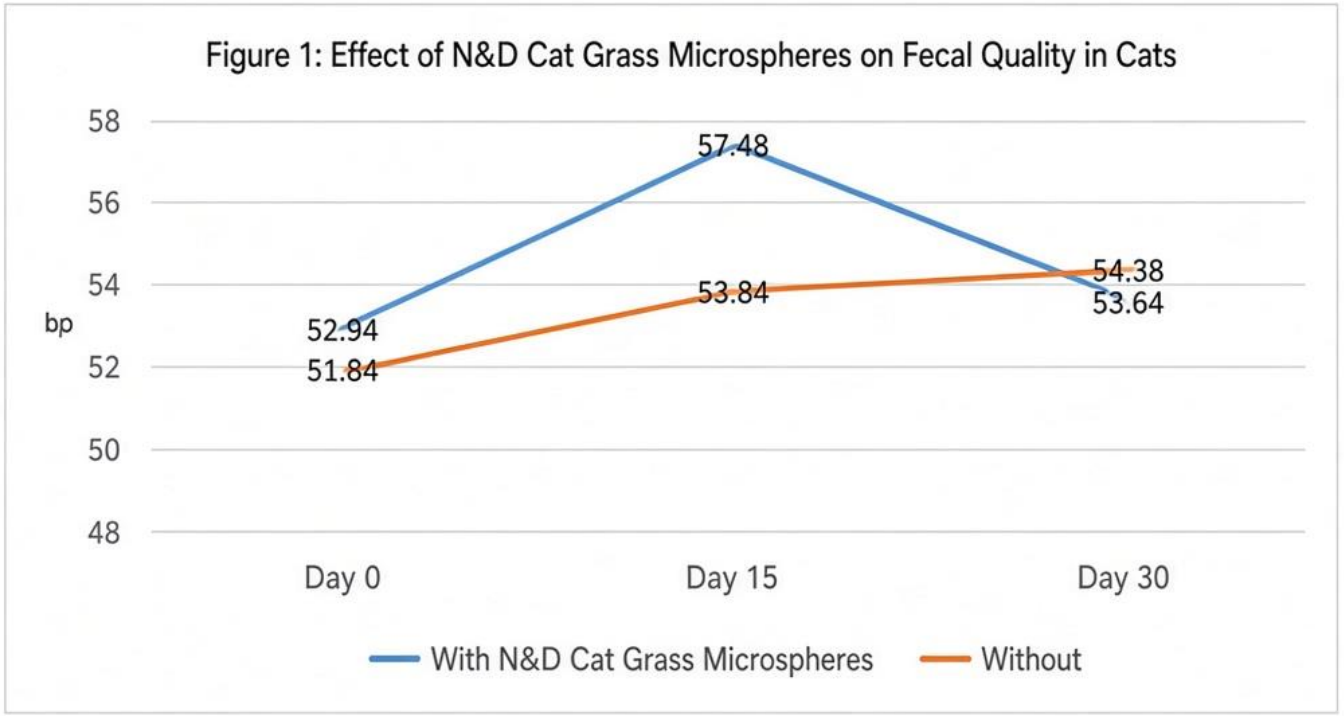

There was no significant difference in the weight change of dogs and cats in the experimental group in the 0th, 2nd, and 4th weeks; the weight change of dogs and cats was significantly different in the 6th and 8th weeks.

Evaluating the effect of N&D microspheres on assisting weight loss in dogs and cats from three aspects: body condition score, weight change, and biochemical indicators, the effect is obvious.

N&D Cat Grass Microsphere Overview & Experimental Data

【Main Ingredients】 Barley grass powder, psyllium husk, proteinase, lipase, taurine, glutamine, fructooligosaccharides

【Product Component Analysis Guarantee Value】 Glutamine 3500-6500mg/kg, Taurine ≥0.34%, Moisture ≤10%

After the experimental group cats took N&D Cat Grass Microspheres continuously for 15 days, their fecal quality improved significantly, indicating that hairballs in the intestines were expelled. After taking them for 30 days, the fecal quality recovered,说明 the hairballs in the intestines were basically cleared, and the hair was discharged significantly in the early stage and decreased significantly in the later stage, improving the fecal quality.

No vomiting occurred during the experiment, and the frequency of hairballs was also significantly reduced.

N&D Cat Grass Microspheres can significantly improve the hairball problem in pet cats and help them expel hairballs smoothly.

Enteric Sustained-Release Technology — Protection

✓ Enteric coating: Wraps nutritional ingredients (such as probiotics) in special polymer materials, resistant to gastric acid and bile salts, and can be slowly released in the intestines, significantly improving utilization.

Nutrient Supplementation Passing the Stomach is Key

The intestines are the main site of nutrient absorption in cats and dogs. Nearly 99% of nutrients are absorbed through the intestines, but during the process of reaching the intestines, some nutritional ingredients are broken down by gastric acid and bile salts.

Microencapsulation Process

✓ Encapsulate nutrient components (such as vitamins) with a polymer protective layer, then spray-freeze them into microcapsule crystal spheres, transforming the nutrient elements into individual particles to provide physical isolation, preventing the mutual interference of nutrient components.

Improve Palatability

By physically isolating nutrients, reduce pets' resistance to their smell, such as probiotics and fish oil; small-particle treats further improve palatability while reducing the risk of powder.

Avoid Antagonism

Applying microencapsulated technology, physical isolation significantly reduces nutrient interactions, such as the Maillard reaction between chondroitin sulfate and glucosamine, preventing over 90% functional failure.
