JINOVA™ | Company & Brand Introduction Scalable

Automatic Pet Wash, Care & Dry System

A Healthier Life for Every Pet

JINOVA™

Innovative Pet Care Technology Designed Around Real Pet Care Needs. Powered by Advanced Manufacturing.

JINOVA™ is a U.S.-owned pet technology brand focused on innovative, intelligent, and automated solutions for professional pet care businesses and pet families.
Driven by real U.S. market needs, JINOVA focuses on product innovation, brand development, practical functionality, and reliable customer experiences.

Advanced Technology & Manufacturing

JINOVA products are manufactured in China, leveraging advanced engineering, automated production capabilities, and quality control processes. By combining innovative product concepts with efficient manufacturing, JINOVA aims to deliver reliable, high-quality pet care solutions.

U.S. Market Operations & Support

JINOVA leads U.S. market development, brand management, distribution partnerships, customer support, and local after-sales service. Our goal is to make professional pet care more convenient, efficient, and accessible through innovative technology.

Business Partnerships

Wholesale | Distribution | OEM/ODM Collaboration

JINOVA welcomes partnerships with professional groomers, pet service providers, distributors, and other pet industry businesses.

JINOVA™
Happy Pets · Healthy Life

All-in-One Smart Pet Wash, Care & Dry System

Smart · Automatic · Clean · Healthy · Labor-Saving

Cleaner Pets Happier Homes

Key Smart Features

Automatic Shampoo Dispensing
Auto supplies shampoo, reduces manual work and helps control usage.

360° Swirl Mist Cleaning
Multi-directional mist washing for comprehensive cleaning.

Automatic Disinfection
Built-in disinfection function for added hygiene.

Constant Temperature Control
Regulates washing and drying temperatures for greater comfort.

Negative Ion Purification
Releases negative ions to refresh the air and reduce odors.

Efficient Drying
Built-in drying system to dry pet fur quickly, reducing manual blow-drying.

HEPA Filtration
HEPA filter for airborne particle filtration (e.g., pet dander).

Multi-layer Air Filtration System
Primary + fine + activated carbon filtration to capture pet hair and dander and reduce odors.

Pet Hair Collection System
Collects loose pet hair during grooming to help keep the interior clean.

Removable Hair Collection Box
Easy to remove, clean, and reinstall for convenient routine maintenance.

More Than a Pet Wash — A Smarter, Healthier & Happier Pet Care Experience

Technology Reduces Labor

Automated washing, care and drying streamline pet grooming, lower labor intensity, and improve efficiency.

Healthier Pets & Cleaner Homes

Disinfection and multi-layer filtration help reduce bacteria, allergens, and odors, creating a cleaner, healthier environment.

Harmonious Human–Pet Living

A comfortable, safe and stress-free grooming experience for pets, and greater peace of mind for pet owners.

A New Pet Care Experience

Smart, all-in-one, convenient and thoughtful — bringing a higher-quality, more enjoyable pet care lifestyle.

JINOVA™
Happy Pets · Healthy Life

Product Overview & Core Technology

All-in-One Smart Pet Wash, Care, Dry & Hygiene System

Revolutionary Cleaning Technology
Utilizes a 360° spiral atomizing system to turn water into fine mist, deeply cleaning pet hair and dirt for a more thorough and efficient wash.

Intelligent Full-Process Control
Automatically completes washing, drying, disinfection, and other steps with one button, freeing your hands and improving care efficiency.

Double Sterilization Guarantee
Combines negative ion purification with high-efficiency HEPA filtration, achieving 99.99% sterilization, effectively killing bacteria and viruses.

Silent and Comfortable Experience
Noise level ≤ 60 dB, reducing pets' anxiety during grooming and providing a quieter, more comfortable experience.

Convenient Installation Design
Uses standard connections with no professional installation required; the whole machine can be set up in about 3 minutes.

Intelligent Constant-Temperature Heating
Built-in constant-temperature heating, directly connected to pipe water, with a safe heating system that prevents leakage and ensures reliable use (100% safety guaranteed).

Full-Scenario Applicability
Multiple capacities (60–350 L) and sizes (500–1300 mm) for home and commercial use, from small to large pets, meeting diverse grooming needs.

Technology Changes Labor
Automated and intelligent grooming significantly reduces manual work, lowers labor intensity, and improves efficiency.

Healthier Pets & Cleaner Homes
Disinfection and multi-layer filtration reduce bacteria, allergens, and colors, creating a cleaner and healthier living environment.

Harmonious Human-Pet Living
A comfortable, safe, and stress-free grooming experience for pets, and greater peace of mind for pet owners.

A New Pet Care Experience
An all-in-one, smart, convenient, and thoughtful solution for higher-quality pet care and a more enjoyable pet lifestyle.

Product Functions & Performance

Fully automatic all-in-one machine for pet bathing, drying, sterilization, and disinfection

Installation, Certification & Quality Assurance

JINOVA®
Happy Pets Healthy Life

All-in-One Pet Wash, Care & Dry System

Installation & Deployment + U.S. Compliance + Quality Control + One-Year Main Unit Warranty

Standard Connections | Direct Water Supply | Drainage | Power | Ready to Operate

Convenient Installation Design

≈3 Min

Standardized connection accessories are designed to simplify setup. The source material states that household installation can be completed in approximately 3 minutes.

Installation Steps

01 Position the Unit
Place the machine on a stable, level surface with access to water, drainage and power.

02 Connect Water Inlet
Connect the standard water-supply hose to the machine and the available water source.

03 Connect Drainage
Install the drain hose and route it to an appropriate drainage point.

04 Connect Power
Connect the power supply according to the final model's electrical requirements.

05 Check & Start
Confirm all connections, switch on the unit and verify normal system operation.

1 Connect Water Supply

2 Connect Drainage & Power

3 System Ready for Use

Certifications & Quality Assurance
