JINOVA™ Smart Pet Wash Business Ecosystem

MEETCHINA365™ | Professional Pet Care Business Solutions | Category 12.2

COMING SOON — PROJECT LAUNCH ANNOUNCEMENT

Our JINOVA™ Smart Self-Service Pet Wash Business Ecosystem is preparing to launch. The official launch date will be announced separately. Equipment configurations, software functions and partnership terms are subject to final confirmation.

PART I | Business Ecosystem & Partner Network

A business-to-business solution connecting equipment sourcing, software and payments, grooming supplies, store planning and ongoing operational support.

Join Our Network

- Purchase — own and operate the equipment with procurement and implementation support.
- Lease — a proposed lower-upfront-cost option, subject to commercial agreement.
- Co-Operate — explore revenue-sharing and location partnerships on agreed terms.

Core support: equipment + software integration + payment options + consumables + marketing and after-sales coordination.

PART II | Equipment & Smart Store Solutions

The proposed system pairs a white smart self-service control unit with a professional pet washing tub. Customer-facing branding may be customized with “Your Brand Here.”

Equipment & Operation Overview

- Wash and care: washing station, temperature-controlled water and associated supplies.
- Drying: adjustable airflow and temperature-control functions, subject to equipment verification.
- User experience: touchscreen, emergency-stop button and optional scan-to-start/payment integration.
- Digital operations: planned store dashboard, orders, membership and payment management.

Illustrative Store Formats

Store concept	Suggested service mix
30 m^2 Compact Community Store	Self-service wash, grooming, reception and product display
60 m^2 Standard Community Store	4 self-service stations and 1 grooming room
90 m^2 Community Flagship	6 service stations, grooming and activity areas
120 m^2 Urban Flagship	5 enclosed stations, grooming and 6 proposed boarding rooms

Implementation & Compliance Notes

All layouts are concepts, not approved architectural plans. Actual installation, utility requirements, accessibility, animal welfare, local permits, 24/7 unattended operation and payment integration must be validated. Disinfection and software capabilities must not be represented as verified until supported by technical evidence.
